

Managed Endpoint Detection and Response

Huntress Managed EDR brings the tech *and* the experts to find and stop attackers in their tracks.

Basic endpoint defenses aren't enough and top-tier endpoint security shouldn't be reserved for the largest enterprises with big budgets. Huntress Managed EDR levels the playing field with a solution built and priced for *all* businesses, not just the 1%.

Huntress combines purpose-built enterprise-grade tech, elite threat experts, and 24/7 threat hunting and monitoring by seasoned analysts to find, stop, and evict hackers. We focus on cutting through the noise to surface real threats, not false positives. And if hackers find a gap, we're on it day and night—detecting, isolating and eliminating the threat before they can cause damage.

Key Benefits

Comprehensive visibility

When attacks happen, you'll be protected. Our **purpose-built EDR** surfaces real threats, leaving hackers nowhere to hide.

Our team is your team

Huntress' **team of industry-recognized threat experts** uncover adversary activities and tradecraft that helps power our EDR solution. That means you only see high-confidence, validated threats with **<1% false positives**.

Less Worry, Less Stress

Our 24/7 global SOC has your back, hunting, monitoring, and responding to threats around the clock with an industry-leading **8 minute MTTR**.

Wreck Hackers, Not Your Budget

Get more from your budget *and* enterprise-grade endpoint protection. Our straightforward, everything included pricing keeps things predictable—**no surprises**.

Complete Coverage, No Catch: Huntress Delivers What You Need to Wreck Hackers

| | Purpose-built, Not Bolted Together | 24/7 Protection | Only the Threats That Matter | Rapid Containment & Response | Simple Pricing & Packaging |
|---------------|--|---|--|---|---|
| Huntress |  Combines enterprise-grade endpoint tech with our team of experts managing everything for you. Hackers don't rest, and neither do we. |  Watches your back 24/7 with our global SOC of expert threat analysts, responders, and hunters who cut through the noise and focus on the threats that matter. |  You're alerted about the most critical threats, not flooded with noise. Our team of threat experts ensures we alert on high-accuracy incidents with very minimal false positives. |  8 minute MTTR. Hackers are contained before they can cause a disruption. Active remediation to remove their foothold, and guidance to bolster defenses against future attacks. |  Straightforward pricing includes the tech and fully-managed service, providing maximum value for your investment. We ensure you have everything you need – no extra add-ons or service tiers required. |
| Other Vendors |  Tech that's built for enterprises with big budgets to afford the tools <i>and</i> the experts, or buy bolt-on services at added cost. |  Varying degrees of SOC maturity and coverage, ranging from alert forwarding services with automated threat hunting approaches to hyper-automated SOC's with low human involvement. |  Drowns you in a sea of alerts with little context, diverting focus from other priorities and, crucially, from the threats that truly demand attention. |  Gives hackers extra time to meet their objectives, placing the burden on your team to track down and stop threats that operate with speed and precision. |  Sells you low-value services packages and then slaps on pricey add-ons—only to have you realize what's missing when it's already too late. |
