Managed EDR

Endpoint protection built for every enterprise

Endpoint security tools were designed for enterprises with big budgets. Huntress Managed EDR is made for all businesses. We continuously protect your endpoints with an 8-minute MTTR to find and stop attacks fast.

Managed ITDR

Modern attackers don't need malware – just a login

Identity is the new endpoint, and attackers know it. Huntress ITDR detects and stops identity-based threats in Microsoft 365 with a 3-minute response time and low false positives.

Managed SIEM

Threats evolve. Your SIEM should too.

Huntress SIEM is built for all teams and businesses. With Smart Filtering technology, we collect only what matters to security—reducing noise, retaining critical signals, and accelerating response. Our SIEM simplifies compliance, minimizes overhead, and delivers enterprise-grade protection at a predictable price.

Managed Security Awareness Training (SAT)

Expert-backed training for safer teams

Training content and simulations learners actually enjoy, managed for you to make administration easy. Unlike the rest, it's powered by current threat intelligence so you have fewer security incidents.
