

Evolving the Hunt

Today's hackers see you as an easy target. Huntress changes that. Huntress delivers a powerful suite of endpoint protection, detection and response capabilities—backed by a team of 24/7 threat hunters—to help you fight back against today's determined cybercriminals.

BRING HUMAN EXPERTS TO YOUR SECURITY TEAM

The Huntress ThreatOps team enables you to streamline your defenses and add the power of real, around-the-clock threat hunters to your team. Using technology to scale their expertise, our analysts can help identify, investigate and isolate hidden threats that would otherwise remain undetected.

SECURITY MADE SIMPLE

No appliances. No complicated configuration. No constant fine-tuning. The Huntress Managed Security Platform is a simple and affordable cloud-delivered solution that makes it easy for you to defend against hidden threats and advanced attacks. Simply let our technology and ThreatOps analysts deliver advanced security for your endpoints without all the guesswork.

ACCELERATE YOUR EVOLUTION

Attackers are finding new ways to get past traditional defenses, and they show no signs of stopping. The Huntress Managed Security Platform is built by offensive security experts who continuously add services to extend the depth and breadth of your security posture and keep you one step ahead of today's advanced threats.

HOW HUNTRESS WORKS

1

Detect

Our lightweight agent detects, collects and sends data to our cloud for analysis of suspicious activity and potential threats.

2

Analyze

Our automated engine performs initial analysis of the information collected by the agent. Then our ThreatOps team reviews the full context of that data to determine the scope and severity of potential threats.

3

Respond

When a threat is confirmed, a unique and easy-to-understand incident report is delivered with step-by-step remediation instructions to eliminate the threat and harden your security posture.

Key Features

- **Protection from advanced threats** and coverage across the entire lifecycle of an attack
- **Gain security expertise** by adding Huntress' ThreatOps analysts to your arsenal
- **Complement your existing stack** without complicated prerequisites or fine-tuning
- **Clear, actionable incident reports** that remove the guesswork behind overwhelming alerts
- **Resolve incidents at the click of a button** with Assisted Remediation, maximizing uptime and reducing the steps needed to respond
- **Small, lightweight agent** that's designed to slow down hackers, not your devices

THE HUNTRESS MANAGED SECURITY PLATFORM

Through our unique combination of software and 24/7 human threat hunters, Huntress empowers you to level up your game and face today's cyber threats head-on—all with minimal cybersecurity experience required.

ThreatOps

Our ThreatOps team is the backbone of the Huntress platform and can be your secret weapon in the fight against hackers. This team of always-on experts can look into potential threats, analyze hacker tradecraft, create incident reports and help remediate cyber threats.

Persistent Footholds

At the core of our platform is our ability to identify malicious footholds, a key indication that an attacker has successfully slipped past preventive defenses. Huntress monitors for these footholds, and when found, delivers actionable recommendations and one-click approval for automated remediation.

Process Insights (BETA)

Evict hackers faster with near real-time endpoint detection and response. Process Insights merges endpoint forensics with deep network traffic visibility to weed out and stop cyberattacks as they happen.

Managed Antivirus

By providing centralized management and visibility, Managed Antivirus starts the conversation for you to reclaim and amplify existing investment in Microsoft Defender Antivirus, opening up more options to strengthen your security stack.

Ransomware Canaries

Like the old canary in the coal mine, our Ransomware Canaries enable earlier investigation of potential ransomware incidents. Uniquely coupled with our ThreatOps team, our approach weeds out false positives and focuses on actionable intelligence.

External Recon

External Recon gives you visibility into external attack surfaces by monitoring for potential exposures caused by open ports connected to remote desktop services, shadow IT and more.

Discover the Huntress Difference

We partnered with Huntress more than two years ago and haven't had a single regret. Huntress' capabilities to seek out threats on the endpoint, investigate them quickly and provide remediation recommendations provides my team with an incredible weapon to deal with live incidents.
